Super Admin guide

For: Super Admins of AAPNA PEA. **Version:** 2, October 2026.

A Super Admin can do everything an Admin can (see the Admin guide), plus:

- create and manage **admins** and other **Super Admins**;
- **delete** accounts;
- see the **Not in effect** tab in Settings.

Contents

1. Managing admins and Super Admins
2. Deleting an account
3. Not in effect
4. The new joiner review email (hr2@)
5. Good practice

---

1. Managing admins and Super Admins

In **Admin Portal → User Management**:

You can	Notes
Create accounts of any role, including **Super Admin**	The **Role** list offers Super Admin to you only
Edit admins and HR users: details, role, status, password	Changing the role or password, or deactivating, signs them out everywhere at once
Edit another Super Admin's details, role and status	**Not their password**: only they can change it. To stop a Super Admin's access, deactivate the account
Delete an account	The only role that can (section 2)

You can't change your own role or status, or delete yourself.

The last active Super Admin cannot be demoted, deactivated or deleted. Make someone else a Super Admin first.

2. Deleting an account

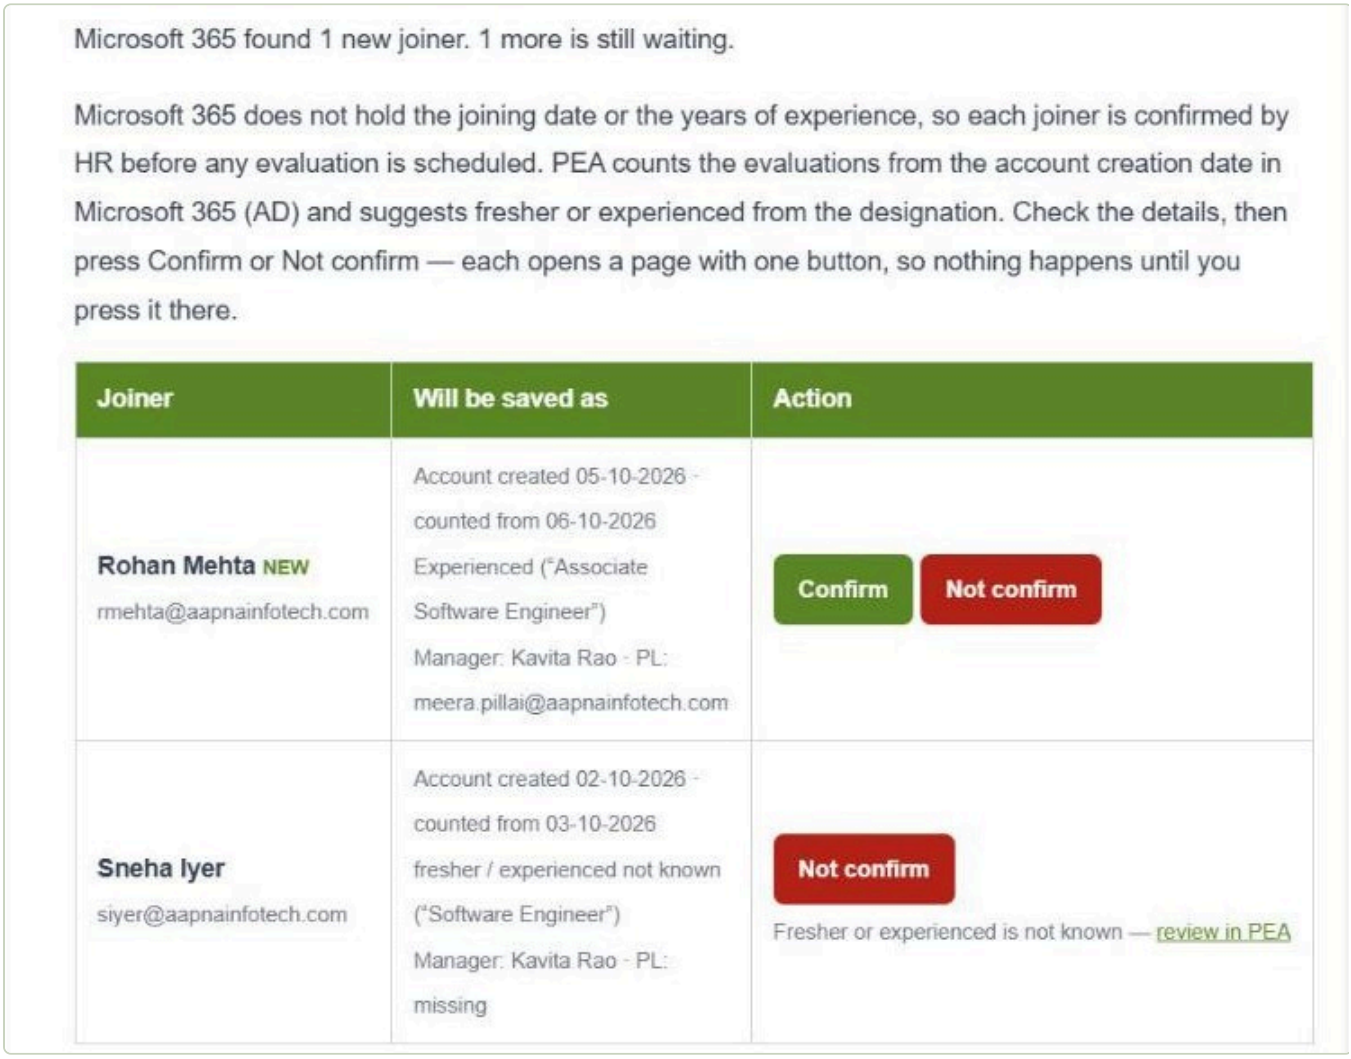

The bin icon in User Management. It is permanent: the account, its module access and its notifications go. **Deactivate instead** if the person may come back, or if you want to keep a record of who they were.

3. Not in effect

Settings → Not in effect (Super Admins only) lists old settings that no longer change anything in PEA. They are kept only for reference. The right-hand column says where to make that change now. You don't need to do anything on this tab.

4. The new joiner review email (hr2@)

When PEA finds new joiners in Microsoft 365, it emails **hr2@aapnainfotech.com** (daily, while anyone is waiting) with a row per joiner: their name and email, what will be saved (account creation date, the date evaluations are counted from, fresher or experienced, manager, project leader), and two buttons. **Only Admins and Super Admins can act on these buttons.**

The new joiner review email

Button	What happens
Confirm	Opens PEA on **New joiners** with this joiner's **Confirm** window already open. Check the details, then click **Add and schedule**: the person becomes a Commando and their evaluations are scheduled
Not confirm	Opens PEA on **New joiners** with this joiner's **Dismiss** window already open. Confirm it to remove the account from the list. Use it for accounts that are not new joiners. No evaluation is scheduled, and the account does not come back

Button	What happens
… — **review in PEA** (instead of Confirm)	Something needs a choice first, such as fresher or experienced not known, or evaluations already past due. Opens the same **Confirm** window in PEA: fill in what is missing, then click **Add and schedule**

- If you are not signed in to PEA, it asks you to sign in first, then opens the joiner's window.
- The buttons never act on their own: they only open PEA, and nothing is saved until you click the button in the window.
- Reading the hr2@ mailbox is not enough: you need an Admin or Super Admin account in PEA.
- If the joiner is no longer waiting (someone has already confirmed or dismissed them), PEA opens **New joiners** and says so.
- Who receives this email is set in **Settings** → **New joiners** → **Send the new joiner review email to** (see the Admin guide, section 4).

5. Good practice

- Keep at least **two** Super Admins, so one can manage the other's account.
- Give Super Admin only to the people who look after PEA. Admin is enough for day-to-day user management and settings.
- Deactivate before you delete.
- Look at **Sent emails** and the Dashboard's **Not sent yet** tile once a week: an email that keeps failing is worth a message to the PEA team.
